

RE: Your Light & Wonder, Inc. 401(k) Plan

You have the right under the Plan to direct the investment of your existing balances, which includes contributions and any earnings on those contributions, and your future contributions to any of the Plan's available investment options. In the event that you have not made an investment election or the Plan Sponsor has not provided direction for a given contribution, it will be invested into the Plan's Qualified Default Investment Alternative ("QDIA"), the T. Rowe Price Retirement Trust (Class F). If your contributions are initially invested in the QDIA, you have the right to transfer out of the QDIA to another investment option at any time. This transfer will be effective the next business day on which the New York Stock Exchange is open for business.

Note: If you do not make an affirmative election for the investment of the assets in your Plan account, the provisions of section 404(c) of the Employee Retirement Income Security Act of 1974, as amended, will apply. This means that Plan fiduciaries will be relieved from liability for any losses that occur as the result of the automatic investment of your Plan account in the Plan's QDIA.

To obtain information about other plan investment options, please log onto NetBenefits® at www.netbenefits.com or call 800-835-5097 to speak to a representative. You may also make changes to your investment elections for future contributions and/or exchange all or a portion of your existing balance into other options available under the Plan via NetBenefits or by phone. We encourage you to review your investment mix and deferral percentage and update as appropriate.

The T. Rowe Price Funds used as the Plan designated default investment option, are based on the assumption that the participant will retire at age 65. Please use the chart below, decided by your Plan sponsor, to determine in which T. Rowe Price Retirement Trust (Class F) your future contributions will be directed, based on your date of birth at Fidelity Investments.

T. Rowe Price Retirement Trust (Class F) Default Chart

Date of Birth	Fund Name	Retirement Date Range
1937 and before or missing/invalid date of birth	T. Rowe Price Retirement Balanced Trust (Class F)	2002 and before
1938 -1942	T. Rowe Price Retirement 2005 Trust (Class F)	2003 - 2007

1988 - 1992	T. Rowe Price Retirement 2055 Trust (Class F)	2053 - 2057
1993 and later	T. Rowe Price Retirement 2060 Trust (Class F)	2058 and later

Date of birth ranges were selected by your Plan Sponsor.

T. Rowe Price Retirement 2005 Trust Class F

Gross expense ratio: 0.37% as of 07/01/2021

Objective: The Trust seeks the highest total return over time consistent with an emphasis on both capital growth and income.

Strategy: The Trust invests in a diversified portfolio of other T. Rowe Price common trust funds that represent various asset classes and sectors. The Trusts' allocations between stock and bond trusts will change over time in relation to each Trust's target retirement date.

Risk: The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Short-term redemption fee: None

Who may want to invest: Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

The investment option is a collective investment trust. It is managed by T. Rowe Price. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 04/07/2017. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 01/13/2012, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.

T. Rowe Price Retirement 2010 Trust Class F

Gross expense ratio: 0.37% as of 07/01/2021

Objective: The Trust seeks the highest total return over time consistent with an emphasis on both capital growth and income.

T. Rowe Price Retirement Balanced Trust Class F

Gross expense ratio: 0.37% as of 07/01/2021

Objective: The Trust seeks to provide the highest total return over time consistent with an emphasis on both capital growth and income. The Trust invests in a diversified portfolio of other T. Rowe Price common trust funds that represent various asset classes and sectors.

Strategy: The Trust's neutral allocations between stocks and bonds will remain constant at approximately 40% stocks and 60% bond investments. Neutral allocations do not reflect any tactical decisions made to overweight or underweight a particular asset class or sector based on market outlook. Instead, T. Rowe Price, based on market outlook, will periodically assign target allocations to the broad asset classes. The target and neutral allocations are periodically reviewed and may differ from actual allocations.

Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Short-term redemption fee: None

Who may want to invest: Someone who is seeking to invest in a fund that invests in both stocks and bonds; Someone who is seeking the potential both for income and for long-term share-price appreciation and who is willing to accept the volatility of the bond and stock markets.

The investment option is a collective investment trust. It is managed by T. Rowe Price. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 04/07/2017. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 01/13/2012, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.

Expense Ratio Footnotes

For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Where the investment option is not a mutual fund, the figure displayed in the expense ratio field is intended to reflect similar information. However, it may have been calculated using methodologies that differ from those used for mutual funds. Mutual fund data has been drawn from the most recent prospectus. For non-mutual fund investment options, the information has been provided by the trustee or plan sponsor. When no ratio is shown for these options it is due to the fact that none was available. Nevertheless, there may be fees and expenses associated with the investment option.
